Price:

Features: ★★★★★

Humbucking, Alnico 2..

Instrument:

0;I replaced the stock pickups and electrics on a Tokai es335 copy. This guitar is a nice bit of wood but the pickup electrics were poor. I sourced the same components as used in 70's ES335's, CTS pots, switchcraft ETC.I sent Allan at Catswhisker pickups an e-mail detailing the output and tone I would like. He was very helpful and said he would make two to order. I think I basically asked for a slightly hotter PAF with a bright sound.

Sound Quality: ★★★★★

I got what I asked for, these pickups have made an average guitar into a usable great sounding instrument. Through a Vox AC30 the pickups are bright and clear with a well defined bass, through a 81 Marshall JMP masterlead 100w the tone is smooth and dare I say it 'classic'.

Reliability/Durability: ★★★★★

Ease of Use: ★★★★★

Customer Support: ★★★★★

Overall Rating: ★★★★★

I am really pleased with these pickups, the service, price and sound quality are excellent.
