

Strat Pickups (set of 3)

Review By:  Hannu Ohtonen, Finland on 3/12/09 1:00 AM

Reviewer Background:

Purchased From:

<http://www.catswhiskerpickups.co.uk>

Price:

EUR97.00 EUR

Features: ★★★★★

Single coil, A5 magnets, polarity S/N(RWRP)/S,wax potted. In my case B/M/N 6,3kohm/6,2kohm/6,1kohm

Instrument:

0;Fender Stratocaster USA Standard 1991, alder body/maple neck with rosewood fingerboard.I replaced all three original stock pickups as I wanted more SRV-like full and clear tone, but not very high output.

Sound Quality: ★★★★★

The output is really clear and full,very rich and warm with the smooth overdrive, and the difference with dynamics comparing to fender stock pickups is amazing within whole tone range.Using them with Fender Twin Amp & Ibanez Screamer.Tone is well balanced in each position.I play mainly blues, R&B and classic rock.For that this is really good match.

Reliability/Durability: ★★★★★

Ease of Use: ★★★★★

Customer Support: ★★★★★

Overall Rating: ★★★★★

I definitely would buy again if destroyed or stolen. I have been playing over 30 years,got Gibson LP std 1989 and Ibanez EW20 & Ovation AE-26 acoustics.I was looking at first Lollar Vintage Blackface Set to upgrade my Strat, as it was pretty close the sound I`d like to nail after listening their samples.After discussing with Allan what kind of sound I`d like to have and what kind of woods my guitar is made from,he offered me the custom strat set based on my needs.The price was very competitive for tailor-made components, and I really do not have any reason to regret this deal.
